

## Lessons identified for notification SWE

**Guidance according to the exercise directive:**

### **Key Issues**

1. Knowledge of the system

Could be improved,

one session, August completed, a second one is planned in October

Difficult to improve the knowledge due to log-in problems

## Lessons identified for notification SWE

Guidance according to the exercise directive:

### Key Issues

2. Contact between the daily user of SSN and the oil spill preparedness and response body in the respective country

No problem, daily users of SSN forwarded info to national response organisation

## Lessons identified for notification SWE

Guidance according to the exercise directive:

### Key Issues

3. Challenges because of the use of the training environment

Not all users had access to training environment

When this was fixed the users still encountered numerous log-in problems.

## Lessons identified for notification SWE

### Guidance according to the exercise directive:

This picture should include the following **Key Issues**

#### 4A. Any other issues

Continuous training is necessary like we conducted during the summer

SSN is not an easy-to use system for “seldom-users”

Education and training 1-3 countries at a time is necessary

## Lessons identified for notification SWE

### Guidance according to the exercise directive:

#### Key Issues

#### 4B. Any other issues

Not all information was forwarded to CECIS as it should

To many problems with log-in an not understandable or lack of feedback

There seems to be confusion regarding usernames, EMSA wanted to delete a username which followed EMSA:s “rules regarding usernamses”

(se anteckningsidan nedan)

## Request for assistance SWE

Guidance according to the exercise directive. For further details see notes

### Key Issues

1. Knowledge of the CECIS and requests for assistance process

Knowledge of CECIS can be improved (August 2017 and upcoming event in October on a national level)

(se anteckningssida)

**SCOPE**

2017 Skagerrak Chemical Oilspill Pollution Exercise

Co-Funded by  
European Union  
Civil Protection

## Request for assistance SWE

Guidance according to the exercise directive. For further details see notes

### Key Issues

2. Validate your country's role and ability to offer assistance. Identify best practices and challenges during this process.

The overall process works for Sweden.

(se anteckningssida)

**SCOPE**

2017 Skagerrak Chemical Oilspill Pollution Exercise

Co-Funded by  
European Union  
Civil Protection

## Request for assistance SWE

Guidance according to the exercise directive. For further details see notes

### Key Issues

3. Any challenges with the CECIS command post exercise module compared with the “original” version

No challenges

Important for all of us is to answer the requesting party and **not answering all!!!** If I need/want to see what is going on I can use the loggbook (se anteckningsida)
